

logger_init

```
graph LR; A[logger_init] --> B[ee_get_first_free_address]
```

A diagram showing a call from the `logger_init` function to the `ee_get_first_free_address` function. The `logger_init` function is represented by a gray rectangular box on the left, and the `ee_get_first_free_address` function is represented by a white rectangular box on the right. A dark blue arrow points from the right side of the `logger_init` box to the left side of the `ee_get_first_free_address` box, indicating the direction of the call.
